

Overview of metadata elements for Great Lakes Marine History Project

	Note 1: "original item" refers to an item owned by one of the participating institutions that is scanned in order to be included in the project.
	Note 2: Numbers in parentheses refer to entry numbers on the 2D & 3D Object Evaluation Form and the Document Evaluation Form. Numbers with no slash are equivalent on both forms, numbers before a slash refer to the 2D & 3D Object Evaluation Form, numbers after to the Document Evaluation Form.
	Note 3: Fields which can be filled on a preliminary basis by UW are in <i>italics</i>
<dc:title modifier="Main" scheme="AACR2">	IF original item has a title (11.), and original item is being reproduced in its entirety, then use title of original item. OTHERWISE, anything goes: ship name and date of construction (9.) are one option, but may not always be most appropriate
<dc:title modifier="Other" scheme="AACR2">	IF original item has a variant title (12.), and original item is being reproduced in its entirety, then use variant title of original item. OTHERWISE, this is not likely to be useful for anything -- leave out
<dc:creator scheme="AACR2">	IF original item has a known creator (13.) (e.g. photographer, author, artist, illustrator, the collector of natural specimens or artifacts, etc.), put it here.
<dc:subject scheme="LCSH">	Use Library of Congress Subject Headings (LCSH) or appropriate terms from other established sources, information provided by selectors (14-17./21-23.) or keywords that describe the item. Terms taken from an established resource (such as Library of Congress Subject Headings) should be indicated with the corresponding scheme attribute
<dc:description>	Describe the digital image, including context, measurement, provenance, distinguishing features, materials and techniques, inscriptions and markings, condition (if other than good), type and subject of object. Primary resource for description is information provided by selectors. (20-23, 25, 26./25, 26.) Use measurements in centimeters of the original item or its surrogate. Measurement can include size and/or weight of the object. The unit of measurement should be used (ex., cm., in., ft.) plus the measured dimensions of height, width, and/or depth. Objects(s) made of precious metals such as gold is usually recorded. Example, grams (gm.), avoirdupois (oz.), Troy (oz.dwt.) Provenance is the name of a previous owner of the object. Type of preferred entries for provenance would be the name of a person, institution or organization that formerly owned the object. Do not abbreviate except for measurements. Include state names with names of cities.
<dc:publisher scheme="AACR2">	<i>The name of the organization digitizing the item. In this case, University of Wisconsin-Madison Libraries</i>
<dc:contributor modifier="Owning Library" scheme="AACR2">	<i>The library owning the original item (6.) Use Library of Congress Authority File for established name.</i>
<dc:date scheme="W3C-DTF">	<i>The date the original item is scanned</i>
<dc:type scheme="DCT1">	<i>Term best describing the digital resource, taken from the Dublin Core list of resource types: probably "image".</i>

<code><dc:format scheme="MIME"></code>	<i>Term describing the digital resource as provided on line, taken from the Multipurpose Internet Mail Extensions list of media types; probably "image/jpeg"</i>
<code><dc:identifier modifier="LocalID"></code>	<i>Code assigned by UW as a unique identifier (8.)</i>
<code><dc:source></code>	<i>Any additional information about the original item that seems worth recording but does not belong anywhere else. A bibliographic citation (/14-19.), or local call number (19./21.)</i>
<code><dc:language scheme="ISO639-2"></code>	<i>The language (/20.) of a textual resource (including images of text, but not photographic images with a word or two of text visible), taken from the Library of Congress list of language codes</i>
<code><dc:relation modifier="IsPartOf" scheme="AACR2"></code>	<i>Use for name of the ship and the date of construction. Ship name should be taken from the standard list.</i>
<code><dc:coverage scheme="W3C-DTF"></code>	<i>The date depicted or described by the original object (18./16.) or (from 26.); for a photograph (under most circumstances), the date taken. Dates should be provided in YYYY(-MM(-DD)) format. Modifiers can be either "Spatial" or "Temporal"</i>
<code><dc:coverage scheme="LCSH"></code>	<i>The location (or period) depicted or described by the original object (from 26.) or (18./16.); for a photograph (under most circumstances), the place taken. Use LCSH standard form for place names when available, otherwise indicate the standard used in the scheme attribute or do not use scheme</i>
<code><dc:rights></code>	<i>A) The rights statement developed by the owning library of the original item. B) Any other rights statement (24.) associated with the original item</i>
<code><media></code>	<i>the digital resource being made available, as follows:</i>
<code><localPath></code>	<i>defined sub-set of the path to the resource on the server</i>
<code><objectID></code>	<i>unique identifier assigned by UW</i>
<code><numComponents></code>	<i>number of serially related digital objects of the resource</i>
<code><relativeSize></code>	<i>code indicating the on line availability of a particular (relatively sized) derivative of the resource</i>
<code><dc:format scheme="MIME"></code>	<i>Term describing the digital resource as provided on line, taken from the Multipurpose Internet Mail Extensions list of media types; probably "image/jpeg"</i>
